Mobile Numerology — A Client Handbook

Your mobile number is one of the most repeated vibrations in your life — you carry it everywhere, share it daily, and receive every call, message and transaction through it. This guide explains how to read those vibrations so you can choose a number that supports your health, money, relationships and career.

Compiled and curated by **Newalkkar Saandiip** — Numerologist, Vaastu Consultant & Life Coach — for the personal use of his clients.

STEP 1

How to Calculate the Mobile Total

Add every digit of your 10-digit mobile number and keep reducing until you get a single digit (1–9).

Example 9 9 1 1 5 4 0 0 9 8 → 9+9+1+1+5+4+0+0+9+8 = 46 → 4+6 = **10** → **1**

Recommended Mobile Totals

Ideal totals are **1, 3, 5, 6** and **7** (if it supports your Birth Number / Destiny Number).

TOTAL	FAVOURABLE COMPOUNDS	AVOID
1	37, 46, 55, 64	28, 82
3	21, 30, 39, 66	48, 84
5	23, 32, 41, 50	—
6	33, 24, 42, 51	—

***Tip:** the last 6 digits of your number carry the highest impact — they vibrate more often than the starting 4 digits.*

STEP 2

Birth Number (BN) & Destiny Number (DN)

BN — Mulank The single digit of your birth *date*. Example: born 7 / 5 / 1974 → BN = 7.
DN — Bhagyank The single digit of your full date of birth. Example: 7 + 5 + 1 + 9 + 7 + 4 = 33 → 3+3 = 6.

Your Mobile Total should be *friendly* with both BN and DN.

STEP 3

Modify the Number Before Pair Analysis

Before reading pairs, replace every 0 with the digit immediately to its left.

Examp le 1	Original: 9234067908	Modified: 9234467998	Pairs: 92, 23, 34, 44, 46, 67, 79, 99, 98
Examp le 2	Original: 9905607087	Modified: 9995667787	Pairs: 99, 99, 95, 56, 66, 67, 77, 78, 87

PAIR LEGEND

- **GOOD** Supportive,
growth-oriented vibration
- **NEUTRAL** Situational — depends
on surrounding pairs
- **BAD** Challenging vibration —
best avoided

CHECKLIST

Quick Steps to Choose a New Mobile Number

- Calculate your **BN** (birth date single digit) and **DN** (full date single digit).
- Take the new number; replace every **0** with the digit to its left.
- Make 9 consecutive pairs and check against the legend (Bad / Neutral / Good).
- Calculate the **Mobile Total**; aim for 1, 3, 5, 6 or 7 (only if 7 supports your BN/DN).
- Confirm there is no **Kaal Sarp Dosh** (3, 4, 7 together) and no **Pitra Dosh** (2, 7, 9 together).
- Avoid **4** and **8** in internal digits; **2** and **7** only once each.
- Prefer **1, 3, 5, 6, 9** with healthy 2-3 repetition.
- Most importantly — give weight to the *last 6 digits* (highest impact).
